

Casey is 1 out of only 15 children in the world born with Chromosome 8p Syndrome, a rare chromosome disorder for which there is no cure. It has left him severely physically and mentally disabled for life, medically fragile, and completely dependent on us for all of his needs. His immune system is compromised, he has difficulty growing and gaining weight, and he suffers from hearing loss, reflux disease, and colitis. Costly modifications are needed to make our split-level Barrington home handicapped accessible. This is why we need your help. PLEASE HELP US HELP CASEY!

Sunday, December 5, 7-10pm
